

Hydro Bond Engineering Ltd

Breakout Moulds: Termination, Moulding, Encapsulation

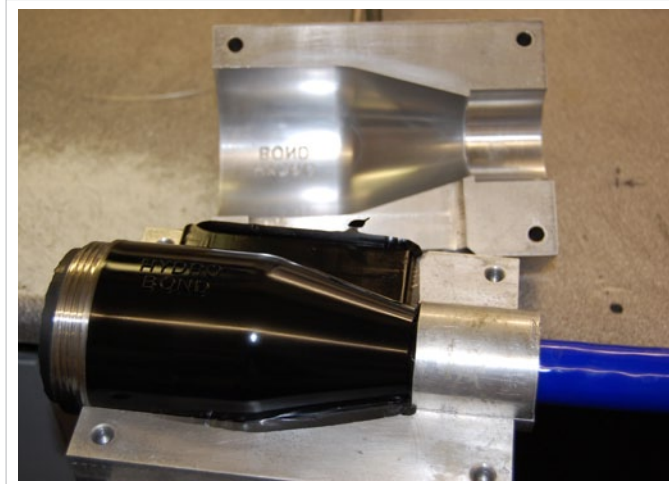

Breakout Moulds

Termination, Moulding, Encapsulation

Hydro Bond Engineering Ltd offer a full termination and moulding service. We can manufacture your complete harness requirement with all breakouts required in accordance with your electrical/optical wiring diagrams. Our break out harnesses are manufactured with either Hydro Bond series connectors, customer specified third party connectors or customer supplied free issue connectors.

Our products have been extensively tested both internally and externally and are field proven on major local, national and international projects.

Our Electrical Engineers and Technicians are fully trained and certified on our equipment by City & Guilds.

Breakout mould / harness manufacturing

Features

- Engineered Design
- Proven moulding materials and moulding techniques
